To log in please go to <https://subscriber.icis.com>

- 1 Enter your **user name** (the email address you used to register for the service) and **password**.

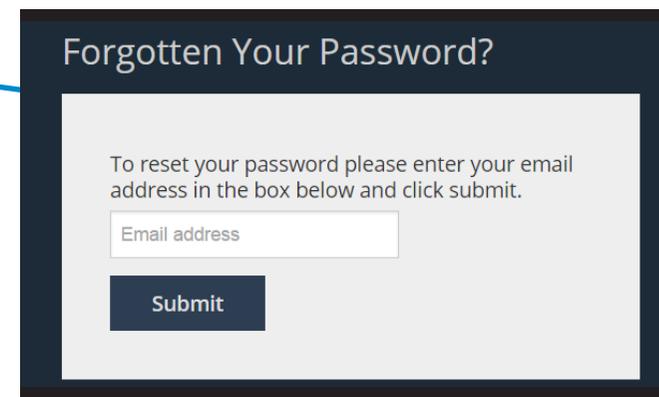

Tick the **Stay logged in** box so you don't have to enter your details every time you log in.

Register a new account
This will open the New ICIS User Registration window. Fill in the details requested to set up your account.

Activate a licence
To activate a new subscription or to renew your subscription add the key licence number that you have received in the email confirming your subscription.

- 2 If you have forgotten your password, you can reset it by clicking on the **Reset password** link.
- 3 Enter your email address in the box and click submit

- 4 You'll receive an email with a link prompting you to enter your new password.

Home Channel

The Home Channel provides users with instant access to data, market updates, expert insights, prices and charts on a single page.

The Home Channel will be set up based on your subscription.

If you have entitlement to fewer than six reports, your home screen prices and charts will pre-populate with those price assessments. If you have more than six reports, at first login you will be prompted to select which reports you want displayed for both pricing and charting.

The Latest News window shows real-time, business-critical information that enables you to make vital decisions. The articles shown are based on your subscription. Click on the title to read the full article.

The Insight and Analysis window shows in-depth, forward-looking analytical content, giving you a broader view of the major developments across the chemicals markets and industry. The articles shown are based on your subscription. Click on the title to read the full article.

The Charting window shows the price movements of your commodities over the past six months. You can change the charts you see at any time. The Home Channel can display up to six charts.

The Pricing window shows the price of your commodities. For each assessment, we show you the mid, high and low price. The green and red arrows highlight changes from the last assessment instantly. You can change the assessments you see at any time. The homepage can display up to 20 price series at the same time.

Find contact details for the ICIS client success team here. If the 'live chat' option is enabled, initiate a chat with an agent. If the option is greyed out, please try again later.

Editing Your Home Channel

Charting

To choose different commodities, click the 'settings' button at the top right-hand side of the Charting window.

To remove charts, click on the 'bin' icon.

To add charts, click on '+ Choose Charts'. Select the commodity and region (if applicable). Then you can toggle on the commodities you want displayed.

Pricing

To choose different commodities, click the 'settings' button at the top right-hand side of the Pricing window.

To remove prices, click on the 'bin' icon.

To add prices, click on '+ Choose Prices'. Select the commodity and region (if applicable). Then you can toggle on the commodities you want displayed.

News Channel and Magazine

To read a single article, click on your chosen article.

Click 'Refresh' to reload the page.

Click 'Select all' to select every article on the page.

Click 'Clear selection' to clear any selections you have made.

The screenshot shows the ICIS News dashboard. On the left is a dark sidebar with navigation options: Latest News, My News, My Saved Articles, My Saved Searches, Advanced Search, My News Preferences, Filters (Product, Region/Country, Company, Article Type, Concept, Date), and RSS feeds. The main content area is titled 'ICIS News' and includes a search bar, a language selector, and a toolbar with buttons for Refresh, Select all, Clear selection, Save, View, and Print. Below the toolbar is a list of 'LATEST NEWS' articles, each with a checkbox on the left and a timestamp on the right. To the right of the list is a 'TOP STORY' section featuring a large article about 'Asia C3 rebounds on improved sentiment, China PP market gains' with an image of a port. Below that is an 'INSIGHT & ANALYSIS' section with a list of related articles, each with a checkbox and a small icon on the right.

Select articles using the checkbox on the left of the article, then click 'Save' to save them into My Saved Articles.

Select articles using the checkbox on the left of the article, then click 'View' to read multiple articles in one thread.

Select articles using the checkbox on the left of the article, then click 'Print' to print your articles.

To customise your Latest News, you can select a range of filters from the left-hand navigation menu. These filters will apply to the Latest News Feed and the Insight & Analysis Feed.

To remove a filter, click on the cross that appears next to it in the left-hand navigation menu.

To clear all of your filters, click on 'Clear All' in the Filter section of the left-hand navigation menu.

These filters will be remembered from session to session. If you have active filters, the filter icon will appear next to your news feeds.

To search for an article within Latest News, type keywords (e.g. part of an article's headline) into the search box on the right.

To refine a simple keyword search, click on any of the grey boxes and enter search criteria to narrow your search.

To do an advanced search, click 'Advanced Search' in the left-hand navigation bar. Click on any of the grey boxes and enter search criteria to refine your search.

Save your searches

After you have completed a search, you can save it as one of your 10 saved searches by entering a search name and pressing 'Save Search'. To view the output of your saved search, click 'My Saved Searches' in the left-hand navigation menu.

ICIS News comes with an email alert service, ensuring you receive the news you need straight into your inbox. These email alert options are all customisable under the My News Preferences section of the ICIS News Channel.

There are three different types of email alerts:

Breaking News

Tick the Breaking News checkbox to receive breaking news as it unfolds, directly into your inbox.

ICIS News daily updates

Set up daily alerts for one or more of these categories: Olefins, Aromatics, Fibre intermediates, Methanol & MTBE and Polymers. Use the checkboxes to select your preferred category or categories and receive an email at 15:00 your local time, with all relevant stories that have appeared on ICIS News in the last 24 hours.

Saved searches

Receive email alerts from specific saved searches; tailor your alerts to your more specific information needs. Use the checkboxes to receive email alerts from a saved search. You can amend your email alert preferences at any time by selecting 'My News Preferences' from the left-hand navigation menu.

Fibre Intermediates

Methanol & MTBE

Polymers

Here is your list of saved searches. To enable email alerts for your searches please select the Email option. To view the content of your saved searches please click [My Saved Searches](#) under My News. For further information and help on setting up alerts please click [here](#).

Search Name	Search Criteria	Email
		<input type="checkbox"/>

Our global team of experts digests and summarises the key issues and their potential impact on the chemical markets. They offer a comprehensive overview of key developments, along with informed opinion and in-depth analysis.

Our Magazine offers:

- In-depth insight into chemical price changes and their impact on the markets
- The details behind headline news stories
- Supply and demand trends and the factors impacting them
- A curated, holistic picture of the chemical markets

To access the latest issue of the Magazine, click on the 'Latest Issue' tab.

Click on 'All Issues' to access our Magazine archive, dating from July 2017.

Next to each issue is a 'Download' button. Clicking this allows you to quickly download the issue in PDF format, which you can read offline.

The screenshot shows the ICIS Chemical Business website interface. At the top, there is a navigation bar with links for HOME, NEWS, DASHBOARD, REPORTS, ANALYTICS, and TOOLS & SERVICES. Below this is the main header with the ICIS logo and the text 'ICIS Chemical Business'. A secondary navigation bar includes 'Home', 'Latest Issue', 'All Issues', 'Special Publications', 'Chemical Profiles', 'My Saved Articles', and a search icon. The main content area features a large 'TOP STORY' section with an aerial view of an industrial facility and the headline 'New Trinseo CEO Bozich seeks growth acceleration'. To the right, there are sections for 'Latest from ICB' with sub-sections for 'MARKET INTELLIGENCE' (Supply chains shift from China), 'NEWS FOCUS' (EU tariff decision hangs over US base oils), 'PRICE AND MARKET TRENDS' (Video: Europe petrochemicals face multiple challenges - Hodges), and 'MARKET OUTLOOK' (Chemical M&A in transition). At the bottom, there are 'Latest ICB Publications' (Latest Issue and Special Publication 'CHEMICAL DISTRIBUTOR') and 'Latest Chemical Profiles' (Acetone - Asia and Phenol - North America) with associated line charts.

You can opt to subscribe to content from Chemical Business NewsBase (CBNB), a third-party provider, within your ICIS News subscription.

CBNB is a leading provider of worldwide chemical business news. CBNB offers timely information essential for tracking trends and developments in the chemical and chemical engineering industry.

It includes financial and business data from influential chemical companies, the latest industry R&D news, intelligence on government legislation changes, and analysis of economic trends.

If you have subscribed to the CBNB add-on, you will automatically see CBNB news articles within your News Channels.

If you would like to add CBNB to your subscription, please contact your account manager or ClientSuccess@icis.com.

Dashboard Channel

The **Dashboard Channel** displays the dashboard view with Home and Workspace tabs.

you close that message, you will be automatically directed to the Quotations Preference Window in your Home Channel. Here you'll be able to select what you would like to see on your Dashboard.

If you are a first-time user, a welcome message will pop up. When

Need help? Our Client Success team is now on hand at the click of a button. This will open the Live Chat window. If a member of the team is not available via the chat this will open a new email window for you to send your enquiry.

ANNOUNCEMENTS FROM ICIS

- Correction Notice** (24-Jun-19 16:07): European Daily Electricity Markets. In EDEM 23.115 of 17 June 2019, the French Week 27 Peaks assessment was incorrect. Corrected PDF is now available.
- Correction Notice** (19-Jun-19 13:23): Naphtha (US). The report dated 14 June 2019 was republished because of a formatting problem. A corrected report is now available for download.
- Correction Notice** (18-Jun-19 17:08): LNG Markets Daily. In LMD 10.119 on 17 June 2019 the Argentina August '19 and September '19 spot LNG assessments were incorrect. The South American Index was also incorrect. A corrected version is now available.
- Report Notice** (06-Jun-19 07:52): Toluene Weekly (China, Chinese Language). 根据市场需求, 安迅思拟新增甲苯三角出罐价日度估价和周度估价, 价格将包含交货地为东莞和广州的现货交易、现货报盘和询盘信息。在意见征集期间, 您若有任何反馈, 请联系veronica.zhang@icis.com.

Click on the icon to access correction messages.

Setting Up Your Quotation Preferences

When accessing the Dashboard channel for the first time, click on 'Select quotation' on the 'Quotations for Home'

In the **Quotations Preferences** window, you can find quotes in three different ways:

- 1 Use the search quotes box: enter your search term and click on the search button to the right.
- 2 Find the report that you need in the **ALL REPORTS** drop-down menu and click on search. The results will display quotes related to that report.
- 3 Click through the pages at the bottom of the window to browse all available quotations.

Showing 1 to 15 of 170 entries First Previous 1 2 3 4 5 ... 12 Next Last

Deselect All Cancel Done

Tick the box to show only your selected quotes.

Once you find the quotations you are interested in, make your selection by ticking the boxes on the left of the quote name.

Click **Done** when you have finished your selection. The quotes will appear in your Quotations window.

Price History Window

Once you have selected your quotes, you can decide which of these you wish to see price history and related news for. You can do this by selecting the tick box next to the quote. The information will then automatically appear in the **Price History** and **Market Updates** window.

Click on the to set up a Price Movement Alert for this assessment.

Links back to the corresponding price report where the listed quotation is published.

Keep in mind that when comparing different quotes, the units of the selected quotations must be the same or you will get an error message in the Price History window. Click on the Settings icon to resolve the error.

To display this price history comparison, the currency of all selected quotes on each axis must match unless a specific conversion currency is chosen. The same is true for the selected unit of measurement. Click on the configuration icon above to change the currency or unit of measurement to display the graph.

The screenshot shows the ICIS dashboard for ETHYLENE. At the top, there's a navigation bar with 'HOME', 'NEWS', 'DASHBOARD', 'REPORTS', 'ANALYTICS', and 'TOOLS & SERVICES'. Below that, a 'Home' button and a dropdown menu for 'ETHYLENE' are visible. A table titled 'Quotations for ETHYLENE' lists various quotes with columns for Date, Commodity, Details/Contract, Terms, Location, Unit, Price Range, Mid Point, and Properties. A callout points to a bell icon in the Properties column, explaining it's for setting up a Price Movement Alert. Another callout points to a document icon, explaining it links back to the price report. Below the table, there's a 'Price History' window showing a line chart of price movements over time. A callout points to the legend, explaining that clicking on points allows viewing High, Low, and Average values. To the right, a 'Market Updates' window shows related news articles. A callout points to a settings icon in the chart area, explaining it's used to edit data, currency, unit, date range, and frequency.

Click here to view the **High, Low and Average** of the price series charted.

Hover over the points on the chart that you want to see details for.

The settings window for 'Price History - Linked to Quotations for Workspace1' includes several sections: 'Price History Analysis' with 'Selected Quotations' (Low, Mid, High, Primary, Secondary); 'Primary Axis' and 'Secondary Axis' settings for 'Conversion', 'Currency', and 'Unit'; 'Date Range' with 'From' and 'To' date pickers; and 'Frequency' with a dropdown menu. There are also links for 'About Conversions', 'About Exchange Rates', and 'Get the Excel Plug-In', along with 'Cancel' and 'Update' buttons.

Market Updates Window

The Market Updates window displays news articles based on your settings.

3 Click on the to set up your email alerts. There are three types of alerts: **Price Alerts**, **Market Alerts** and **Summary Alerts**.

- 1 Based on the default setting, you will see related news to your selections in the Quotations Home window.
- 2 You can change this view to see all news that you are subscribed to, or search for specific content by making the relevant selection.

Creating New Workspaces and Tabs

The Home Channel is a fixed feature. You'll be able to easily navigate your way from here and create additional workspaces for your markets.

1 Create additional workspaces by clicking on the + button shown. Up to 15 workspaces can be created. The order of the workspaces can be rearranged by clicking on the tab, dragging and dropping (although they cannot be placed to the left of the Home tab, which will always remain the first tab).

2 You can now **rename** your workspaces by clicking on the **triangle icon** on the workspace tab. This will also provide you with the options to **add data**, **duplicate workspace** or **delete workspace**.

WORKSPACE NAME ✕

Name

[Cancel](#) **Done**

The name of the workspace can be edited by double-clicking on the tab and renaming in the pop-up dialog box.

Adding data to your workspaces allows you to personalise your workspaces with additional windows.

- 1 Add a new window by clicking on **Add data to workspace**. A pop-up window that allows you to make your selections will appear.

- 2 You can add one Quotations window per workspace only. This window will always remain at the top of the workspace. You can add multiples of the other windows (up to a total of 11 per workspace).

- 3 Windows can be rearranged by dragging and dropping.

Flexible Windows

Minimise

Close- delete from workspace

The screenshot shows a dark-themed interface titled "ADD DATA TO WORKSPACE" with a close button (X) in the top right. On the left, there is a vertical list of window thumbnails: "Quotations" (a table), "Price History" (a line chart), "Market Updates" (a list of news items), "Supply & Demand" (a bar chart), and "European Gas Fundamentals" (a table). A blue arrow points from the text in the left column to the "Price History" thumbnail. On the right, a larger window titled "Price History" is displayed, showing a line chart with multiple data series for "2-Ethyl Hexyl Acrylate" over time (Sep '14 to Sep '15). The chart has a legend and a "View Pre-Published Prices" button. Below the chart is a blue button labeled "Add to Workspace".

Charts historical prices. More than one Price History window can be added to a workspace.

When adding Price History and Market Updates windows to any workspace except your Home workspace, you have two options:

1 You can display information related to the quotes you selected in the Quotations window by clicking on the “Link to selected quotations” button. If you choose this option, the link icon will appear closed to indicate the connection to the Quotations preference window. 

2 You can display information related to other quotes within your subscription. Click on the “Select new quotations” button to make your selections. If you choose this option, the link icon will appear broken to indicate that the information is not connected to the Quotations window. 

The **Formula Builder** allows you to effortlessly create and track your contracts as market prices shift, by integrating your formulas into your Dashboard. You can configure and save your formula, to benefit from instantly updated price series and contract prices, all in one place.

The Formula Builder is available with all Dashboard subscriptions.

1 In the Quotations window, click on the **f(x)** icon.

2 Click on the arrow for **Create New Formula** and follow the steps.

7 Click **Evaluate**.

8 Click **Save formula** – this is added to the **Quotations Window** by default.

Demo Video:
How to set up formulas on the Dashboard >

Set Up Email Alerts

You can now set up personalised alerts and manage your preferences in one place. Customise your preferences at any time – easily enable new alerts or disable ones that you don't need.

There are three types of alerts which you can set up:

1 Price Alerts

Notifications informing you of changes in your price assessments or formulas, triggered by the criteria that you choose.

2 Market Alerts

Real-time news notifications on individual commodities about price changes and events affecting prices.

3 Summary Alerts

A single email summarising your selected alerts. Tailor frequency, date and time to best suit your information needs.

You should be able to see new  icons in the **navigation bar**, the **Market Alerts window** and the **Quotations window** on the Home Channel. If they cannot be seen on your platform you may need to refresh your browser by clicking **CTRL+F5**. You should then be able to view all the new icons.

To set up your **Email Alerts**, click on the **Bell icon** found under the 'Quotations for Home' and 'Market Updates' windows. Alternatively, go to 'Alerts' under Tools & Services in the main navigation.

Email alerts will be sent from alerts@icis.com. Make sure that you exclude this address from your spam filters in order to have timely access to your selected market updates.

Set Up Price Alerts

To set up an alert, click on the **Create New** button on the **Email Alerts window** or click on the in the **Quotations window** for your chosen price assessment.

This will open the **Create New Price Alert window**.

- 1 Enter a name for your alert.
- 2 Use the **Search Quotes** function to find the price you subscribe to, then select it in the list of results.

You can also set up a **Formula Alert** by selecting one from your saved **Formulas**. Click on the to open the list.

- 3 Configure the change criteria that will trigger your alert since the last assessment.

You have three options to trigger your alert:

- 1 **Any change** in price.
- 2 Price **increases, decreases or changes** by a specified **percent**.
- 3 Price **rises above, falls below, or changes** by a specified **value**.

You can select the **High, Mid or Low** price point for your alert.

- 4 Set the delivery criteria for your alert and specify a time and date.

You can choose to receive the alert: **Daily, Weekly, Monthly** or **On Publication**.

Tick the box if you want to include it in your **Summary Alert**.

All the **Price Alerts** that you set up will be listed in the **Price Alerts section**.

- 5 Once you have made your selection, click **Save Alert**.

Demo Video: [How to set up Price Alerts >](#)

Set Up Market Alerts

To set up your market alerts, follow the steps below:

- 1 Search for the market you subscribe to by using the **search function** or by scrolling through the list.
- 2 Select the commodity and region that you want to receive the market alerts for by clicking on the **ON** button. The button will turn to **OFF** to show that the alert is active.

Tick the box to show active alerts only.

Demo Video: [How to set up Market Alerts & Summary Alerts >](#)

Email alerts will be sent from alerts@icis.com. Make sure that you exclude this address from your spam filters in order to have timely access to your selected market updates.

Set Up Summary Alerts

You can choose to receive a single email summarising your chosen alerts and tailor the frequency and time to your needs.

To receive **Summary Alerts emails** follow the steps below:

- 1 Tick the **Add to Summary** check box in your **Price Alerts list**. Your alerts will automatically appear in your **Summary Alerts list**.
- 2 Activate your **Summary Alerts** by clicking on the . The button will turn to  to show that the alert is active.
- 3 Set the delivery criteria for your **Summary Alerts email** and specify a time and date.

- 4 Once you made your selection click on the **Update button**.

Update

You can also choose to receive **Summary Alerts** instead of individual emails for your alerts if you prefer to receive one email instead of individual alerts.

You can do this by following these steps:

- 1 Add your alerts to **Summary** by ticking the box in the **Price Alerts list**.
- 2 Deactivate  your individual **Price Alerts**.
- 3 Make sure the **Summary Alerts button** is active. 

 **Demo Video:**
How to set up Market Alerts & Summary Alerts >

The **Price Forecast Window** allows you to chart the price forecast against the last (rolling) twelve months of related price history.

This window is available as part of the Price Forecast reports subscription or as a separate subscription, not including the Price Forecast reports.

- 1 To add a Price Forecast Window to your workspace, click on the **Add data to workspace** button.

- 2 Scroll down and select the option **Price Forecast** on the left side. Click **Add to workspace**.

- 3 Once the window is added click on **Select settings**.

The screenshot shows the 'Price Forecast' window interface. It has a title bar with standard window controls. Below the title bar, there are two main sections: 'Curve Selector' and 'Price Forecasts Selected'. The 'Curve Selector' section contains three dropdown menus for 'Commodity', 'Location', and 'Generation Date', each with a 'Select' option. Below these is an 'Add' button. The 'Price Forecasts Selected' section is currently empty. At the bottom, there is a 'Chart Settings' section with two rows of dropdown menus: 'Price Forecast Range' (set to '1 Year') and 'Currency' (set to 'Original Quoted Currency'), and 'Price History Range' (set to '1 Year') and 'Units' (set to 'Original Quoted Unit'). There are also links for 'About Conversions' and 'About Exchange Rates', and 'Cancel' and 'Update' buttons.

- 4 Select **Commodity**, **Location**, and **Generation Date**.

- 5 Once you made your selection click **Add**.

- 6 Repeat as necessary to add further quote selections. A one-year price forecast series and one-year of price history is the default for each quote selection, but shorter series can be selected. **Original quoted currency** and **original quoted unit** are defaults, but other currencies and units can be selected.

- 7 Once you have made your selection click **Update** to chart.

Data shown in chart is for illustrative purposes only.

Supply and Demand Window

The ICIS Supply and Demand Window uses detailed, objective data on global petrochemical supply, demand, production capacity, and trade flows to empower your business to make long-term, evidence-based decisions.

This window is only available to ICIS Supply and Demand data subscribers.

1 The Supply and Demand window can be accessed via the **Add data to workspace** button and then via the subsequent menu window.

2 Once you have added the window to your workspace you will be prompted to **Select product and region**.

You can customise the product, region, time period and unit as well as the type of supply and demand chart you would like to see, i.e. **Production & Consumption, Capacity & Production** or **Imports & Exports**, by clicking on the drop-down menus.

3 Click **Update** when you have made your selections.

4 Once you have charted your data, you can go back to change your selection using the **Settings icon**.

5 You can view the chart in full screen as well as the underlying data by clicking on the **expand icon**.

6 From this view, you can alter the data displayed as well as download or print the data and full chart.

Links to ICIS' Supply and Demand Data methodology.

Reports Channel

By clicking on the **Reports tab** on the top navigation bar, you can switch the view to see a list of reports you have subscribed to. This view allows you to search for reports, view them online or download them as PDFs. Also, here you can view a reports archive, select favourite reports and set up report alerts.

1 Search by keyword in the **Search Reports box**. You have the option to apply filters to the results.

2 Click on the **arrow icon** on the right side of each commodity name to expand the view and see all reports available as part of your subscription.

3 You can download all the reports included in your subscription by clicking on the **Download All Latest Reports** button.

The screenshot shows the ICIS Reports interface. On the left, there is a sidebar with a 'View' section containing 'All subscribed reports' and 'My Favourites'. Below that is a 'Filter Options' section with a 'Search Reports' input field and a list of report categories including Chemical Price Report, Energy Report, and Shipping Report. A 'Download All Latest Reports' button is also present. The main content area displays a list of reports under the heading 'Reports'. The first category is 'Acetic Acid', which is expanded to show five reports with columns for report name, date, and format (PDF). Each report has a star icon for favorites, a calendar icon for date selection, and 'View' and 'Select' buttons. Below the main list is a section titled 'Selected Reports to Download' which shows a table of reports with columns for report name, date, and format (PDF, HTM), along with 'Remove' buttons. At the bottom right, there is a 'Download' button and a 'Download Format' dropdown menu.

Select viewing mode (online, PDF, Excel where available).

The **Star icon** allows you to make a report a favourite. This will be saved on the **My Favourites** view in the left menu.

The **Envelope icon** allows you to turn on email alerts, letting you know when the latest report is available.

The **Calendar icon** allows you to select the date of the report. There are 12 issues of archive available.

Links to ICIS's full list of available reports hosted on our external website.

Links to the **methodology** details for ICIS reports, hosted on our external website.

To download multiple reports click on **Select** and then on the **download button** at the bottom of the page.

Petrochemicals Analytics Tools

The Supply View of the Live Disruptions Tracker shows you scheduled and unscheduled global shutdowns, expected new capacities, capacity expansions and capacity contractions, as well as plants that are online.

[Access the Live Disruptions Tracker here >](#)

Alternatively, select the Live Supply Disruptions - Supply tile under Analytics in the top navigation.

The bubbles show all disruptions matching your selection. They are colour coded as shown in the 'cause' filter menu. Their size indicates the relative impact of each shutdown based on the respective plant capacity. Hover your cursor over the bubbles to see further information on individual plants.

Refine your results using the filters on the left panel. Default timeframe is from the current month and 12 months forward. Historical data is available from June 2017.

Month-on-month view of changes resulting from shutdowns and new capacity expected to come online. Hover over sections of the chart to reveal detailed information at plant level.

Live Disruptions Tracker - Supply (continued)

Contents page

Results based on your chosen filter options.

Dynamic charts showing the sum of lost capacity, pro-rated over the selected months. View your selection both regionally and globally.

Save a selection for easy access later on without having to reset the filters each time.

Saved filters will be accessible via the drop-down from the Saved Filters button.

Once you have saved a filter, easily update the filter by selecting Update existing in the Save Filter + window.

Surfaces the details of production capacity loss, and also expected new capacities, capacity expansions and capacity contractions.

Read the latest article about the outage.

Demo Video:
How to access the Tracker and use filters >

The Impact View of the Live Disruptions Tracker links production shutdowns with downstream consumption capacity loss. It enables you to assess the market balance and potential price impact.

[Access the Live Disruptions Tracker here >](#)

Alternatively, select the Live Supply Disruptions - Impact tile under Analytics in the top navigation.

This graph shows the results of your selection. Production capacity loss is colour coded in yellow, Consumption capacity loss of the associated downstream commodities is in blue.

Refine your results using the filters on the left panel.

Hover over bars in the chart to reveal the commodity names and details of volumes of losses.

Shows by month, the difference between the loss in production capacity and the consumption capacity loss of its downstream commodities. A green bar indicates that the **consumption** capacity loss is greater than the **production** capacity loss. A red bar indicates the opposite: The **production** capacity loss is greater than the **consumption** capacity loss.

Detailed view of production capacity loss, month by month.

The screenshot displays the ICIS Price Drivers Analytics interface. At the top, there is a navigation bar with 'Dashboard', 'Reports', 'News', and 'More'. Below this is a breadcrumb trail: 'Home > Base Oils (Europe) > Base Oils (China) > Base Oils (US) > Polyvinyl Chloride (US) > Polyethylene (Asia-Pacific) > Polypropylene (Middle)'. The main content area is divided into three sections:

- Quotations for Home:** A table listing various commodity quotations. The table has columns for Date, Commodity, Details/Contract, Terms, Location, Unit, Price Range, and Mid Point. A dropdown menu is open over the table, showing options to 'Add a Blank Workspace' and a search bar for 'Search workspaces'. Below the search bar is a list of workspace options: Acetic Acid (Asia-Pacific), Acetic Acid (Europe), Acetic Acid (US), Acetone (Asia-Pacific), Acetone (China), Acetone (Europe), Acetone (US), Acrylates (Asia-Pacific), and Acrylates (Europe).
- Price History - Linked to Quotations for Home:** A line chart showing price trends from July 2017 to April 2018. The chart has two y-axes: USD/lb (left, 0.5 to 1.2) and USD/tonne (right, 1,050 to 1,400). Two data series are plotted: 'PP Homopolymer Film (BOPP) DEL US Assesse... (Mid) (USD/lb)' and 'PP Fibre CFR GCC Assessment Spot 2-4 We... (Mid) (USD/tonne)'. A legend is visible on the right side of the chart.
- Market Updates - Linked to Quotations for Home:** A section displaying related news. It includes a search bar and a 'Market Alert' toggle. The news items are listed with their titles and dates, such as 'MARKET ALERT, UPDATE LyondellBasell, Braskem's controlling shareholder ente...' dated 15 Jun 18 14:08.

These workspaces give you a visual analysis and impact commentary for multiple factors in one place, such as import or export parity, substitution trends and more.

Available for selected commodities and regions. See list here >

- 1 To view the pre-defined workspaces, select the **+** icon.
- 2 Select the commodity and region that you want. A new workspace will be added to your view.

You can save up to **15 workspaces** to display at one time.

You can remove a workspace any time by clicking on the drop-down and choosing the **Delete** option.

What will each chart provide?

Price series: Comparative price series are plotted per graph which can be edited out depending on your preferences. The price series do not relate to the threshold line or impact commentaries.

Impact commentaries: An at-a-glance understanding of the market reaction caused if a spread goes above or below the threshold, and the necessary action required.

Spread: Shows the difference between the two price series. Where applicable, ICIS editors take into account consumption factors, VAT and import duties when calculating the spread to ensure the most accurate price comparison.

Example shown: Ethylene (Asia-Pacific)

Threshold line: Indicates the typical point where a market reaction occurs based on the size of the spread. Editors derive this figure based on their knowledge of the market and market validation.

Click to show/hide lines on graph: Hide lines on the graph to allow the chart to rescale to show more details. Or, unhide lines on the graph to identify the driver behind a major change in trends.

Demo Video: How to access Price Drivers Analytics workspaces >

The screenshot shows the ICIS Reports page. The main content area displays a list of reports under the 'S & D Outlooks' section. Each report entry includes a title, a date (Apr 2018), and a PDF icon. A 'View Select' button is present for each report. A 'Selected Reports to Download' section is visible below the list, showing two reports selected for download. A 'Download' button is located at the bottom right of this section. A 'Download All Latest Reports' button is also present in the left sidebar.

How to access the Supply & Demand Outlooks >

The ICIS Margin Analytics tool provides you with actionable data on variable margins, to inform price talks, benchmark performance, and assess supply risk.

Key developments offers a brief update on weekly changes and implications for the commodity and region selected.

View the weekly performance of the key processes in the region.

View the methodology underpinning each margin analytics webpage.

Historical key developments and notifications can be viewed chronologically under latest insights. Click to open a post. Click the back arrow in the browser to exit the post and return to the main panel.

The screenshot shows the 'VARIABLE MARGINS ETHYLENE - ASIA' page. The 'KEY DEVELOPMENTS' section is active, displaying a list of updates for 14 June 2019. The 'LATEST INSIGHTS' section is also visible, showing performance metrics for 'NAPHTHA CRACKING - SPOT' and 'METHANOL TO OLEFINS - SPOT'. The 'CHART FILTERS' section at the bottom allows users to filter data by location, process name, date, price terms, and currency.

This screenshot shows the 'LATEST INSIGHTS' section of the 'VARIABLE MARGINS ETHYLENE - ASIA' page. It displays a chronological list of key developments, including dates, times, and brief descriptions of events such as 'Asia Ethylene margins in MTO and Naphtha processes decreased in the week of 14 June due to increasing feedstock prices and falling ethylene prices'. The 'CHART FILTERS' section is also visible at the bottom.

To access margin data, scroll down in the main panel. Filter the data by location and process. Set a time frame, select price terms, and preferred currency and units. Click 'Apply filter' to display the results.

The Margin Components chart displays the main product value, co-product credits, feedstock and utility costs, the variable margin and the variable costs. Hover over the line to see the values.

Display of hide the components making up the margin by clicking on the legend at the bottom of the graph.

For more information on these values, click on Info. Use the info box to provide feedback or ask questions.

Set the chart to fullscreen.

Download the data in CSV format, or the chart image as a picture.

Click the Margins build-up tab to see a chart that illustrates how the margin is built up from the different components identified in the first chart.

If you are looking at variable margins for a downstream product you can also see a breakdown of the input costs and output values for the selected process by clicking the relevant tab. If your selected product has derivative products, these charts will appear below.

Scrolling further down, compare the variable margins of production units using different technologies in the same region.

Compare your selected margin with the variable margins of production units using the same technology – this time in different global locations.

View performance trends in costs and margins by week, month, quarter and year.

VARIABLE MARGIN PERFORMANCE

Info Fullscreen Download

	Current week vs last week (% change)	Current MTD vs last month (% change)	Current QTD vs last quarter (% change)	Current YTD vs last year (% change)
Variable margin (\$)	-9.9 ▼	38.8 ▲	-39.1 ▼	-45.6 ▼
Main product value (\$)	-3.0 ▼	-15.1 ▼	-8.8 ▼	-24.0 ▼
Co-product credits value (\$)	0.2 ▲	-2.3 ▼	-1.0 ▼	-16.8 ▼
Feedstock costs (\$)	1.1 ▲	-15.8 ▼	3.8 ▲	-12.5 ▼

The Process Overview is high-level view of the flows of different products into and out of the representative production unit used to calculate the variable margin in terms of value, and volume.

View variable margins for derivative products (available for upstream products only).

Input costs show the weekly build-up costs in dollars per tonne for the selected process. Output values show the build-up of the values of different types of product in dollars per tonne for the selected process.

Download the data from each chart, or download all the data available for variable margins, using the Download Data panel at the bottom of the page. Select the area, process type, time period, price terms, currency and units you're interested in, select a format and download.

If you want to download data from multiple queries, and don't want to have to repeat your selection every visit, use the generate link feature to pull up to date data directly into an excel sheet every week.

Simply copy the link and set up the query in excel.
